History and profile The magazine was started in 1961. It was initially a quarterly but later became a bi-monthly in 1993 and a monthly in 1994. It is based in Bangalore. See also List of Kannada-language magazines List of Kannada-language magazines (1962–present) References External links Category:1961 establishments in India Category:Indian monthly magazines Category:Kannada-language magazines Category:Magazines established in 1961 Category:Media in Bangalore Category:Kannada literary magazines Category:Bi-monthly magazinesThis invention relates to the field of optical communications systems and more particularly to the area of optical delay-line systems. Delay lines are important components in communication systems. In particular, optical delay lines are often used in systems in which the transmission medium is a fiber optic cable. The purpose of an optical delay line is to use a finite-length fiber optic cable to store a specified amount of time. In general, an optical delay line is made up of a series of optical elements which store optical pulses as they travel down the optical cable. The delays required for various telecommunications applications, such as those involving either single-sideband or double-sideband signals, have been implemented by cascading a number of different delays. The difficulties with cascading delays are that they require a great number of components, such as taps, couplers and mode converters. This multiplicity of components increases the cost and complexity of the system. In addition, it 82157476af
